

Family Engagement Tool

\$950

per 2-year subscription

What is it?

The Family Engagement Tool (FET) is a 2-year cycle providing a self-analysis and needs assessment process for a school team. With this information, the team creates an Action Plan and is then guided through implementation.

Turn Research into Results

The FET is web based and includes our SCN Resource Library to aid implementation. Our tool and resources are soundly rooted in research and best practice, tightly aligned with the national family engagement framework, and help schools move forward with meaningful family engagement.

FET provides:

- Distance Learning sessions to ensure proper implementation
- Research-based, online materials to complete a guided needs assessment
- Action Planning tool to create, plan, and assign tasks for tracking progress
- Videos, rubrics, workshop materials, and course curricula for ongoing support
