

# School Community Index

Inform your family engagement planning.

.....  
Get to know your school community.

## What is it?

The School Community Index (SCI) survey provides a simple, repeatable process for evaluating perceptions and conditions in the area of family engagement relative to your school community.

“What the survey does is give you an idea of what you’re doing well and what you’re not doing well...There were a lot of positive things...The initial survey showed a lot of strengths, but it flushed out lots of issues.”

-Conway Elementary Principal in Conway, NH

## Turn Research into Results

The school’s process begins with the Survey Implementation Plan which can be completed by the school team in one meeting.

The design of the School Community Index allows it to be used as a stand-alone assessment tool or integrated with other school improvement efforts.

## SCI provides:

- Distance Learning sessions to ensure proper implementation
- Research-based, online surveys for your school
- Threshold Analysis summarizing your data within the Index components to assist in future planning
